

UK's leading manufacturer of acoustic movable walls

We manufacture, supply and install solid and glazed acoustic movable wall systems for high end offices, schools, leisure facilities, hotels, shopping centres, domestic homes and more.

Our unrivalled product range is supported by a dedicated operations team. While our technical teams makes sure you have access to the latest products innovations.

At the same time, our prices are highly competitive, enabling you to purchase a high quality solution to your needs without excessive costs.

So many advantages when you choose Divisions

Making space flexible, stylish and more productive is what we are about. Whatever your need or budget, our vast product range has the right solution.

Divisions precision-crafted acoustic movable walls and partitions offer you -

No nonsense delivery - because everything is manufactured in the UK, which is also kind to our Carbon Footprint.

Unrivalled choice - from a range of almost twenty product lines, fifteen standard panel finishes and the option of three-hundred more.

Simplicity of use - including a 'press-a-button-and-that's-it' option, unique to UK manufacturers.

Excellence in performance - with sound ratings tested and approved by UKAS accredited Independent Acoustic Consultants, The Building Test Centre, AIRO and SRL.

The latest innovations - thanks to our dedicated research and development team.

A bespoke solution - our in-house design team always starts from scratch to meet your design and space needs.

Peace of mind - thanks to our twenty year's experience and 12 month warranty, supported by our directly employed fitters and service engineers.

With Divisions you'll find it all adds up.

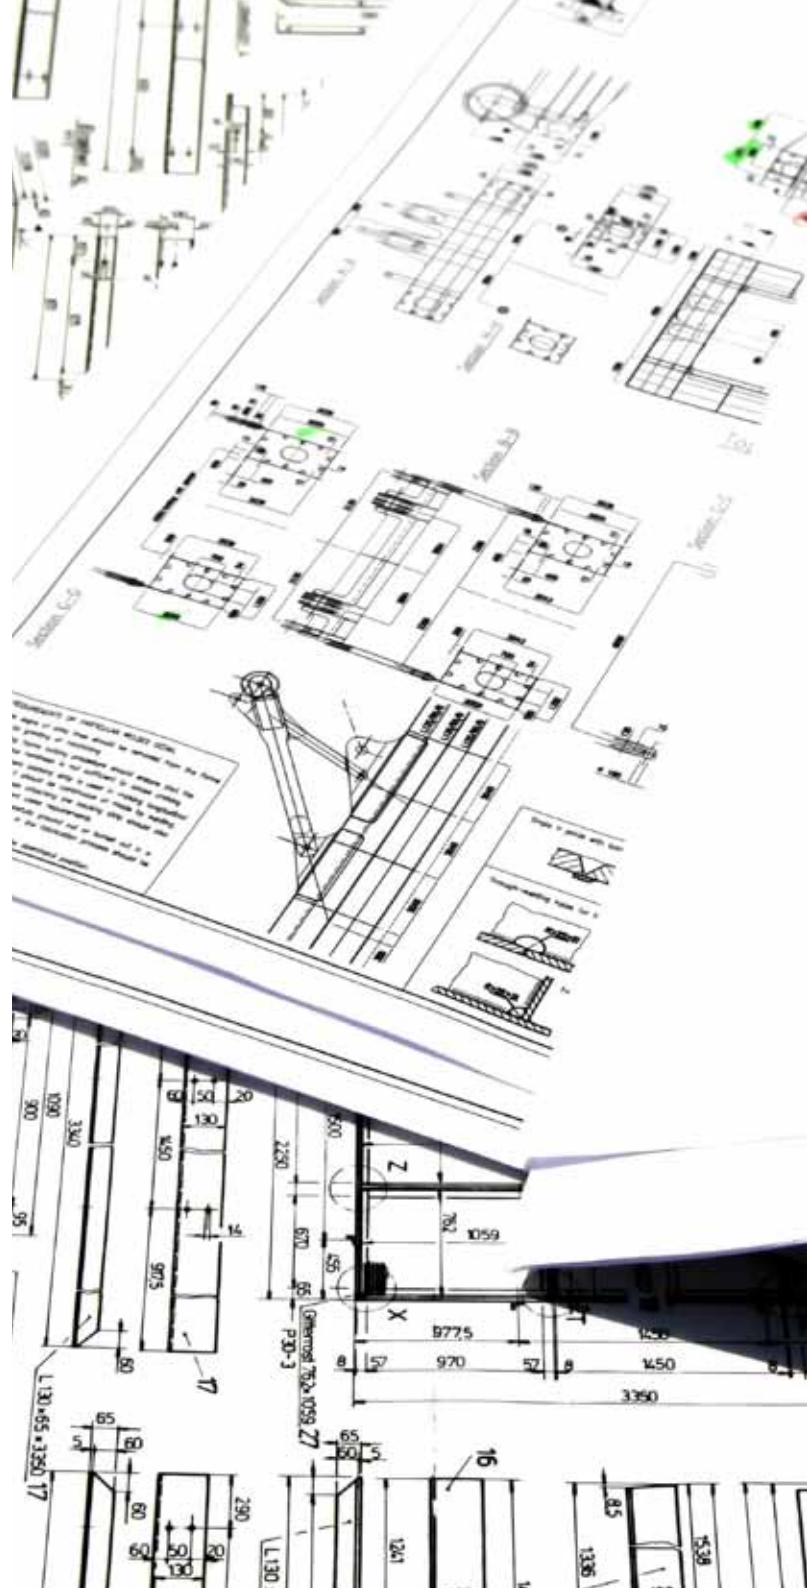

Project Process

With you every step of the way

You know your needs - the available space, the required flexibility, the design setting, the acoustic requirements, the budget limitations. We'll work alongside you all the way through to completion.

This is how the Divisions process works, from first contact to final sign off -

- A no obligation consultation, onsite visit and quotation.
- A detailed site survey, reviewed against the estimate.
- Submission of initial design and approval.
- Full technical drawings and approval.
- Production in our Sussex factory.
- Logistic planning for the installation.
- Installation by our fully qualified and certified teams.
- Handover of project, including staff training.

	dB Rating	Module Thickness	Module Width	Wall Height

Additional products available in the glass range

GS35 - Movable Wall

An aesthetically pleasing and easy to use fully glazed glass to glass system. Designed for internal non acoustic environments including hotels, shop fronts, airport terminals and break-out areas.

The elements move quietly on a ball bearing suspension system running on an aluminium track. For added aesthetic appeal and impact, the walls can be further designed to be straight or angled.

GS35 - Straight Slider

A straight sliding system with applications that include single sliding, bi-parting, fixed panel and telescopic options available.

All will take a variation of up to 12mm glass panels, up to 250kg per panel. The top track profile is made of natural aluminium and finished to the highest quality.

GS Vista Single Door

With striking clean lines and sharp contemporary appearance - glazed or solid - this will enhance any office space.

As with all Divisions products, it benefits from an outstanding acoustic performance having been tested to 42dB.

For more information on any of our systems above please contact your regional office.

Surface Finishes

Certification

Fire resistance

Utilising standard either Euro Class B or Euro Class C coverings, or a full 60 minute Fire Rated System built and tested to BS EN 1364-1:1999 and BS EN 1634-1:2008.

Non Toxic

Divisions products use low carbon energy components throughout. Properties observed in tests, performed in conditions of unusual temperature and humidity, reveal no detrimental effect to the structure.

Chemical Resistance and Humidity

During tests no change occurred during and after exposure to a selection of proprietary cleaning products.

Acoustic insulation

The systems have been laboratory tested to certify they provide acoustic insulation up to the level specified at point of manufacture. This ranges from 38dB Rw to 57dB Rw. This system has been tested according to BS EN ISO 140-3:1995 standards.

Additional Finishes

The standard range of surface options carry minimal lead times.

Other finishes are also available including -

- Extended veneer range.
- Magnetic dry wipe.
- Vinyl.
- Laminate.
- Forbo Nairn Pinboard.
- Painted MDF to suit RAL colour.
