Double Glazed Flush Partition Door

Unique locking system
and straight edge frame

With its striking clean lines and sharp contemporary appearance it is certain to enhance any office space be it glazed or solid. Of course it also has the added benefit found in the heart of all products, that of a beneficial acoustic performance. Independent acoustic consultants PDA have carried out provisional tests using their simulator with the door achieving a very impressive 41dB.

Features

Fully double glazed 44mm thick door leaf; standard or bespoke sizes, offering a perfect synergy with any double or single glazed partition system.

Clear toughened glass structurally bonded to internal chassis giving an all glass appearance.

Narrow (63mm) back coloured frit border to all edges (in optional

colours) which remains parallel (no lock box protrusion) even when fitted with locks & levers.

Can be installed in any door frame type, (timber, aluminium, steel), having a conventional 45mm rebate, single or double door sets.

Door can be mounted on conventional 100mm stainless ball bearing hinges, off set pivot arrangements or Vista integral controlled hinge closing system*.

Options for various closer types including; overhead door or frame mounted rail closers*, floor spring pivot or slide rail*, Vista integral hinge closer system*.

Double perimeter Quiet-fin seals to upper door edges, ensuring that an unbroken seal contact is maintained even around the locks and hinges.

Offset, Back to back 25mm diameter stainless steel (as standard), or push

plate and pull handle furniture. Lever, latch, lock options with latch only, latch and lock with euro profile cylinder, self locking and panic release features all available within the standard chassis profile (no additional lock box protrusion needed).

Various "designer" architectural solid stainless steel levers sets available.

Automatic mechanical drop down acoustic threshold seal can be included in both hinged and pivot versions of the door.

Acoustic performance up to; 41Rw(dB) depending on frame design.

Integral fully functioning venetian blinds can be engineered within the glazing cavity to further enhance the design or to match with those in the surrounding partitioning.

* Feature subject to Divisions design approval, enquire for further detail.

As with all products it is manufactured in our own factory here in West Sussex where we carefully control the quality and delivery whilst proudly promoting British manufacture and local employment.
